PEACE OF MIND

Method:

The purpose of the survey was to monitor the vessel for sources of radioactive material including radioactive sources and NORM (Naturally Occurring Radioactive Material).

A radiological survey of several areas was carried out to check the presence of radioactive material and source of radiation.

NEB-211 monitor, Serial Number 3420 with an J 302 Geiger Muller type tube was used to check for presence of NORM (Naturally Occurring Radioactive Material).

Summary of Findings:

Areas monitored including the sections BRIDGE, B DECK, A DECK, FORECASTLE DECK, SHELTER DECK, MAIN DECK, BELOW MAIN DECK were checked for the presence of NORM (Naturally Occurring Radioactive Material) and radioactive sources with no reading above ambient background detected (Pls. refer to survey checklist for full list of areas surveyed).

Conclusions:

Based on the representative of monitoring carried out in accessible areas it can be concluded that the surveyed areas (as identify above) of the vessel were radiation free and "safe for men" at the time of survey.

Signed for Incomar Inspection Expertise Service C.O.
