

Dear Madam / Sir,

We have pleasure to have this opportunity to provide yourself with the information about our company Incomar International Co. And the services that we are able to provide. The following letter will also explain Incomar's missions, views, and goals and what sets us apart from the rest of our competitors.

Incomar is certified by the Under Secretariat of the Prime Ministry of Foreign Trade. Our company was founded by experienced minds that have been in this business sector for over 20 years. Our goal is to establish a neutral, independent, confidential and reliable stand amongst the parties. We aim to provide reliable services in all the necessary areas of our field with a wide network of international representatives.

Incomar prides itself on providing exceptionally high quality and dependable services to all of our clients. While we are constantly expanding our network, we are able to remain as the leader in this competitive industry as we have recently been granted with **BID quality award (QC100)** being one and only company in this sector! Our innovative leaders running the company using their 20 years of expertise to build a strong structure for which the company is based upon.

Our company Incomar is an approved company for Quality Management System – **ISO 9001:2015** and holding **TURKAK TS EN ISO/IEC 17020:2012** Accreditation in the fields of;

- Draft Survey onboard the vessels for Quantity ascertainment
- Metallurgical materials quantity (by draft survey / on weighbridge) and physical quality controls
- Radiation controls; Metallurgical scrap and metallurgical products, semi-finished products, and fields

Before we set forth our company's working areas, we would like to advise one of our major goal;

The health and safety of our personnel and respect to the nature and our environment are our top priorities and we have regular indoor trainings for this HSE Management System.

PEACE OF MIND

1. IRON & STEEL SCRAP

Loading and discharge supervision and quality controls on Iron and Steel Scraps.

We conduct Quality and Quantity controls of approximately 2,000K MT of Iron and Steel Scrap in a year not only in Europe, USA, Ukraine and Romania but also in Turkey at Iskenderun, Aliaga, Izmit, Ambarli and Samsun.

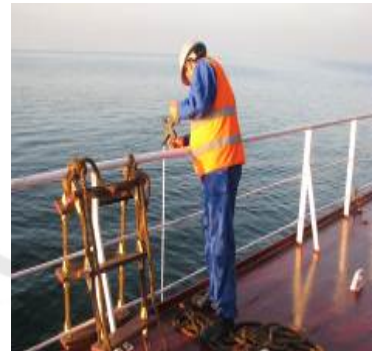

2. DRAFT SURVEYS

Draft Marks

Draft Meter Device

Draft survey is not an exact science as the attending surveyor must take into account a number of factors. Those may include but are not limited to the vessel condition, availability of draft marks, vessel particulars, ability to accurately sound tanks (ballast and consumables) and the prevailing weather/sea conditions.

- Reading draft marks, initial and final
- Calculation for displacement
- Initial and final ballast tank inspection
- Checking for hydrostatic tables and sounding tables
- Checking accuracy of constant figures

3. STEEL PRODUCTS (FINISHED STEEL PRODUCTS)

- Establish Quality & Quantity, Sampling on lot basis, Preparing the samples for analyses
- Dimensional and physical test, Chemical testing at independent laboratory
- Witnessing the analyses, Supervision to weighbridge
- Packing and marking controls of packed materials
- To Carry Out Damage Survey, Sealing / Unsealing Inspections
- Conduct various inspection services during manufacture, at loading and discharging stages for Steel Finished Products such as flat and round bars on L/C basis.

4. RADIATION MEASUREMENT

The purpose of the survey is monitoring the vessel for sources of radioactive material including radioactive sources and NORM (Naturally Occurring Radioactive Material). A radiological survey of several areas is carried out to check the presence of radioactive material and source of radiation.

5. GAS MEASUREMENT

The purpose of the survey is to ensure that the vessel is inspected before or after the construction, modification, maintenance, repair or dismantling, and in order to ensure the safety of life, property and the environment in terms of docking/landing to the facility. Gas measurement is carried out by Gas Measurement Expert in various locations onboard.

6. MARINE SURVEYS

P & I SURVEYS

- Valuation Surveys
- P & I Condition Surveys (Entry & Condition & Follow Up)
- Hull and Machinery Surveys,
- Cargo Surveys, Damage Surveys,
- Port Captain

ON / OFF HIRE BUNKER and CONDITION SURVEYS

- Before and after loading general condition survey
- Bunker survey
- Damage survey during discharging and after loading
- Witnessing to repair, cost investment, repair team agreement
- Inspection for reason of the damages
- On/off hire certification
- Master's satisfaction report for damages
- Final settlement with a protocol.

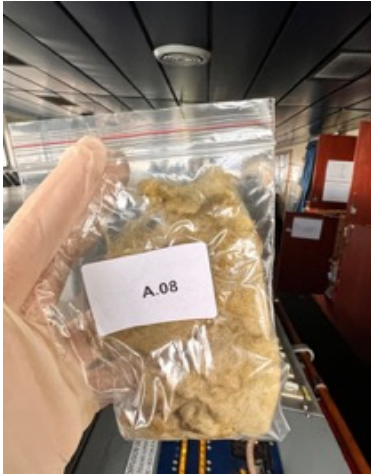

HATCH COVERS ULTRASONIC AIR-TIGHTNESS TESTS

We work for ship owners, charterers, commodity traders, insurance, and P and I companies and judge suitability of the vessels holds by applying Ultrasonic Hatch Leak Detection. Leaking hatch covers are frequently the cause of large cargo damage claims, and condition of the hatch covers, joints, and coamings etc. have major importance. For its' fast and accurate application we do prefer and use in our all services Ultrasonic Hatch Leak Detectors for the most reliability of this vital service. Cygnus-Hatch Sure Detectors are used by our qualified surveyors. (Our team have been trained by Cygnus on behalf of IIMS, UK)

7. IHM- INVENTORY OF HAZARDOUS MATERIALS (PART I, II & III)

Ship owners and operators must comply with specific regulations, including the development and maintenance of the Inventories of Hazardous Materials (IHM), which provide comprehensive information about dangerous substances present on ships. All ships, whether they are already scheduled for recycling or newly built, must carry an IHM on board and also for existing ships, the IHM should be in place. We check your ship's ability to comply with both the EU SRR and HKC Convention requirements. Ships which are destined for recycling are also required to carry an IHM, which will be specific to each ship and we assist you in obtaining the issuance of an international Ready for Recycling (RfRC) certificate where applicable. IHM Reporting is carried out by our qualified and DNV class approved Haz-Mat Experts.

8. GENERAL CARGO INSPECTION SERVICES

LOADING / DISCHARGING SUPERVISION

Conforming to requirements of customers, top qualified surveyors of Incomar International Expertise Services Ltd. Co, equipped with state-of-the-art measuring devices certified by international standards, is able to attend during whole course of loading period under the strict care of 7/24/365, in order to check condition of the goods. Our staff are also competent to check ships holds hatch covers water tightness services, using Ultrasonic Devices.

Suitability of cargo holds are also verified visually prior to loading, and any residue of sea water is detected using AgNO₃ on the surface and walls of the holds. Condition of all the gaskets on drain channels, hatch covers, manholes, cross joints are checked and verified. All above stages are precisely followed by our surveyors who secure the protection of our customers rights by timely intervention when need arises. Digitally taken photographs are attached to our final inspection report

PEACE OF MIND

LIQUID BULK CARGO CARRIERS AND TANKERS

- Qualitative and quantitative surveys
- Tank cleanliness inspection
- Inspection and sampling of all grades

CRUDE OIL, PETROLEUM PRODUCTS, LUB-OIL, GAS AND CHEMICALS LOADING / DISCHARGING SUPERVISION SERVICES

Ship / Shore Tanks Measurements, Line Displacement (when necessary), Sampling (Both Ship and Shore), Testing Services, Line Transfer Inspections, Marking Additive controls, Shore Tanks, Stock measurements, Ensure Correspondence to Protect Clients Interests..

BUNKER DELIVERY SURVEYS – BARGE / MOTHER VESSEL GAUGINGS

In order to protect our clients' interests, conforming to standards (Marpol 73/78 Ann.VI), barges are gauged and verified for the Quantity onboard before the bunkering operation. As per requirements samples from both barges and receiving vessel are drawn for future reference. Bunker tanks of the receiving vessel also gauged before and after bunkering in order to ascertain quantity transferred. Similar bunker survey services are also rendered during on hire and / off hire of the vessels.

- Before and after operation, vessel bunker tanks inspection
- Before and after operation, barge/shore tanks measurement
- Drawing samples (both barge and receiving vessel)
- Witnessing analysis
- Empty tanks inspection (ROB calculation), (barges)

Some of the operations we perform:

Tupras – T.Ciftlik and Aliaga, petroleum products representing.

BTC, Crude Oil, Botas-Ceyhan, representing.

Iraq/Kirkuk Crude Oil, Botas-Ceyhan representing.

Various Base Oil Services

Various Bunker Delivery Services

On / Off Hire Bunker & Condition Survey services

9. INSURANCE AND EXPERTISE SERVICES

Container & Cargo Condition & CSC Controls

Determining suitability of containers' condition can greatly reduce the risk of liability for firms exporting goods. Container Safety Convention (CSC) Controls are conducted by qualified inspectors to verify the structural integrity and suitability. Stuffing supervision, and sealing the container and issuance of quality and Quantity reports.

PROJECT DEPARTMENT

The Project Department of Incomar, stands as the consultants for achieving and meeting the Certificate of Conformity expectations of authorized institutions in desired exporting countries, and provide such certification and consultancy along the process.

The countries we render inspection and certification services are;

Algeria, Libya, Iran, Egypt, Sudan, Saudi Arabia, Kuwait, Nigeria, Kenya, Tanzania, Cameroon, Iraq, Burundi, Ethiopia, Gabon, Qatar, Uganda, Zanzibar, Bangladesh, Ecuador, Mozambique, Philippines, Russia, Ukraine, Uzbekistan, Angola, Zambia, Botswana, Republic of the Congo, United Arab Emirates, Central African Republic, Cad, Tusk, GCC, Ghana, Guinea, Indonesia, Lebanon, Liberia, Mali, Somalia, Togo. Zimbabwe, Benin, Zambia, Morocco, Tunisia, India, Bulgaria, İsrail, Dubai, Syria, USA, Malaysia, China, Burkinese, Gina (Bissam), Gina (Coraky), Madagascar, Niger, Senegal, Sierra, Leone,

*Please contact us for other country inquiries;

- Follow-up and monitoring the process / Manufacturing Surveys
- Approval of Loading and Dispatching
- Attendance during Loading Discharge

LASHING

With lashing, Incomar assures the safe and swift delivery of goods and equipment to the destination and lashing is one of the most important issues in international and domestic logistics. Incomar provides certification services for approved lashing of the goods, secured during transshipment, discharge or during the transportation as per road conditions and sensitivity of the products.

LABORATORY TESTS

Analyzing, finalizing tests and follow-up tests of relevant products analysis performed by international and domestic accredited laboratories as per ISO 17025 Standard when the need arises.

CSC:

Convention for Safe Containers documentation is conducted for the authentication of the safety of container frames used in transportation, in accordance with international regulations.

Accredited enterprises may conduct CSC documentations.

When there is a need, our staff are present to protect your interests by our highly experienced surveyors and we attend operations under the strict care of 7/24/365, and keep our principals informed of various data and we ensure necessary correspondence with the parties concerned in order to protect our principals' juridical rights.

Our service is finalized with a final photographic surveyor report where includes full supporting details and documents so that parties can claim for compensation when necessary.

We truly appreciate to have an opportunity to perform services for your esteemed company through our global offices / liaisons and our head Office is based in İstanbul-Turkey.

For further information regarding our company you can visit our web page at; www.incomarinspection.com

We are at your entire service for any inquiry or request which will be welcomed by our Professional team for your Peace of Mind!

PEACE OF MIND
