

5TH December 2023

TO WHOM IT MIGH CONSERN

Regarding: NCB 6 / IPS - spare parts historic overview

The NOFI Current Buster 6 including NorMar IPS (integrated pump system) is designed with the purpose of having the most efficient oil recovery system available, as a single vessel high speed system. This also include having the most durable system limiting the need of spares and critical part for repair, reducing the life span costs to a minimum.

Since the introduction of the NOFI Current Buster 6 including NorMar IPS back in 2012, AllMaritim has delivered in the excess of 50 complete systems. These systems are used by all major oil companies around the world, with more than 30 units in operation in Brazil.

We are proud to be able to confirm that during all these years, the need for spare parts or critical parts by our clients have been kept to a minimum. Proving the system to be extremely durable in a variety of different offshore situations.

The table below gives a good overview of the different supply of spare and critical parts delivered:

Country	Product	Spare/critical part	Year
Brasil	NorMar IPS 4	Umbilical, new	2021
Brasil	NorMar IPS 4	Umbilical, new	2023
Brasil	NorMar IPS 4	Hydraulic connections	2018
Brasil	NorMar IPS 4	IPS/MSP pump bucket	2019
Brasil	NCB 6	Replacement pillow	2021
Brasil	NorMar IPS 4	IPS floating arms brackets	2015

Best regards
AllMaritim AS
